

Description:

The Developmental Alcohol Research Training (DART) Program (T32 AA007453) announces the availability of postdoctoral fellowships at the University of Pittsburgh. The DART Program approaches training in alcohol use and addiction research from a developmental perspective, focusing on gestation to adulthood. The DART training faculty are highly experienced and offer mentorship in areas of high priority to NIAAA such as the developmental stages of alcohol use and abuse, neurobiology, timing and consequences of alcohol use, racial and gender differences, and the effects of health disparities on the development of alcohol use and misuse. The training faculty have expertise in developmental, epidemiological, clinical, and neurobiological approaches, and advanced quantitative methods. Trainees have access to large, longitudinal cohorts that allow analyses across multiple developmental points. Training involves active participation on research projects with mentors, supplemented by courses in Addictive Behaviors, Developmental Psychopathology, Epidemiology, and Biostatistics, and by the required Career and Research Development Seminar. The DART program faculty are committed to training researchers to become independent investigators with the skills and tools for collaborative, multidisciplinary research in developmental studies of alcohol use and abuse in order to accomplish excellence and innovation in developmental alcoholism research.

Website:

<http://www.alcoholtraining.pitt.edu/>

Qualifications:

Candidates must have a Ph.D. or M.D., excellent writing and analytical skills, and a demonstrated interest in alcohol-related research. The applicant must be a U.S. citizen or permanent resident in accordance with NIH regulations; current NIH levels of stipend support can be found at <https://grants.nih.gov/grants/guide/notice-files/NOT-OD-19-036.html>

Application:

Send curriculum vita, statement of research background and future interests (including potential mentors), and three reference letters to:

Dr. Gale A. Richardson and Dr. Brooke Molina (Directors: DART Program)
University of Pittsburgh School of Medicine
Department of Psychiatry
3811 O'Hara Street
Pittsburgh, PA 15213
